FOR IMMEDIATE RELEASE

INFORCE to Exhibit at Land Forces 2026 in Perth, Marking More Than 15 Years Supporting Australian Defense and Law Enforcement

Gen 3 WML Series and new ARC modular long-range weapon light series on display at Booth 3N07 with 360 Defence

PERTH, Western Australia — INFORCE will exhibit at Land Forces Expo in Perth, Western Australia, October 6–8, 2026, marking more than 15 years of support for the Australian Defence Force (ADF) and Australian law enforcement agencies through its partnership with 360 Defence.

The INFORCE WMLx White/IR remains the standard-issue weapon light for the ADF's EF88 Austeyr service rifle, following its testing and selection under the LAND 125-3C program in 2015.

In addition to the Gen 3 WML Series, INFORCE will showcase the new ARC modular long-range weapon light series. Designed for demanding applications ranging from C-UAS platforms and general-duty rifles to tactical teams, the ARC delivers a precisely engineered beam profile and extreme output for enhanced long-range target identification. Its modular design further allows the ARC to be adapted across a variety of specialized platforms and mission requirements, extending its capabilities beyond conventional rifle-mounted applications.

The ARC is tested to MIL-STD-810H and is designed to accommodate a range of switching and mounting configurations without locking users into a single setup.

The full INFORCE product range will be on display at Booth 3N07 with 360 Defence, INFORCE's exclusive Australian government supplier since 2011. Defense organizations, law enforcement agencies and weapon manufacturers attending Land Forces 2026 are invited to visit the booth and see the latest INFORCE weapon lighting systems in person.

AVAILABILITY AND CONTACTS

Australian government, defense and law enforcement customers: All INFORCE inquiries, T&E requests and orders are handled exclusively by 360 Defence. Visit 360defence.com.au.

United States customers: Visit inforcelights.com.

ABOUT INFORCE

INFORCE delivers mission-ready lighting engineered for military operators, law enforcement, prepared citizens and home defense users who demand absolute reliability in low-light environments. Tested to MIL-STD-810H, every INFORCE light is waterproof, shockproof and built from mil-spec materials. INFORCE lights are assembled in Texas, United States.

ABOUT 360 DEFENCE

Established in 2011 and operating from Perth and Sydney, 360 Defence is an Australian defense supplier sourcing innovative, fit-for-purpose products for the special operations community. A business-to-government company serving defense and state and federal law enforcement only, 360 Defence is a member of the Defence Industry Security Program (DISP) and has been the sole authorized INFORCE vendor in Australasia since 2011.
